- | | |
|------------------|---------------------------------------------------------------------------------------|
| Appearance | - Milky white emulsion |
| Odour | - Herbal - Spring Green |
| Specific Gravity | - 1.0 |
| pH | - 6.8 – 7.8 |
| Bacteria | - 7 strains of bacteria for fast and quick digestion
200 billion spores per gallon |

Recommendations

Caution: Always pre-test on an inconspicuous area of fabrics and carpets for colour fastness.

Small Spots – Use full strength, apply to soiled area. Wait 10-15 minutes, agitate with brush or cloth and blot with paper towel or clean cloth. Large Areas – Remove as much solid waste as possible. Dilute 10-14 parts with 1 gallon of water (1:12 approx.), use above procedure. Use carpet extractor to pick up liquid. Important: It is necessary to allow solution time to work and penetrate soiled areas for the best results. Rule of thumb is 10 minutes or longer.
