

2015 Sustainability Update

There's a NEW look for Green Certification

In April of 2013 changes occurred between Environment Canada and Ecologo. UL Environment is now handling the certification of sustainable products.

Our Green Certified Products will now display the newly updated ECOLOGO symbol. This is your reassurance of a **truly sustainable, "GREEN" product!**

Along with the new logo are new certification numbers. The conversion chart below shows the old CCD numbers and their corresponding **New UL numbers**.

Old CCD Number		NEW UL Number
Hand Cleaners CCD-104	→	UL 2784
Hardsurface Cleaners CCD-146	→	UL 2759
Disinfectants and Disinfectant Cleaners CCD-166	→	UL 2794

ECOLOGO Certification is for products that meet multi-attribute, life cycle-based sustainability standards.

Who is UL Environment? (www.ulenvironment.com)

UL Environment is a global independent safety science company providing over 100 years of innovative solutions for energy, sustainability and environment. With Green Cleaning being a key factor in the Janitorial and Sanitation industry over the past 15 years, it has been a challenge to prove the efficacy and durability of product use as consumers have been unconvinced that these products are truly "GREEN". UL Environment certifies products through stringent validation and testing services, providing the consumer with assurances the products they use and are certified under UL are truly "GREEN".

How does Armstrong Manufacturing support your sustainability efforts?

We have been a leading chemical manufacturer for 46 years and have grown with the ever changing world when it comes to chemicals and cleaning. Our **ProSeries Green™** line offers you an easy and economical way to use "GREEN" products that help you support and reach your sustainability goals:

- Third-party tested and **certified to UL Environment standards**
- Concentrated formulas to help **reduce carbon foot print**
- Fragrance free formulas help **alleviate personnel or client allergies and sensitivities**
- Free of VOC's (Volatile Organic Compounds) for **reduced environmental impacts**
- **Surveillance Audit** of Quality Management Systems performed
- **Private label opportunities available**
- Recycled packaging for **reduced landfill impact**

ProSeries Green™ — it's your ideal choice for going "GREEN".
