MOP-IT-OFF

MOP-IT-OFF Stripper is an extremely high powered, "mop-on" type stripper, designed to strip floor finishes without the use of a floor machine or scrubber. It is non-ammoniated and water based, so odour problems are eliminated. Its high performance means stripping is no more difficult than stripping conventional finishes.

Use/Benefits

- Works without mechanical agitation.
- Great reduction in time required to strip floors.
- No solvent odour.
- No restrictions on use or areas of use.
- No disadvantage in stripping burnished finishes as opposed to conventional finishes.

Physical Properties

Appearance	-	Clear, water-like liquid
Odour	-	Butyl
pH	-	12.8
Specific Gravity	-	0.975

Recommendations

NOTE: A test of the particular dilution you intend to use should be made in a small out-of-the-way spot to judge effectiveness, compatibility and safeness to the colours.

The dilution will depend on the degree of stripping required. For normal build-ups 1 part to 4 parts of warm water. In extreme cases 1 part to 2 parts of warm water. Apply solution to floor and allow to remain on surface for no more than 5 minutes. Remove solution with mop or wet pick up and rinse thoroughly. Repeat if necessary.
